

## **Director of Mainframe Services**

**Recovery Point Systems**, Germantown, MD 20874

**US Citizenship required**

**Background check required**

### **About Us**

Recovery Point Systems is a leading provider of comprehensive disaster recovery and business continuity solutions, serving clients across various industries including government, healthcare, and financial services. With a commitment to data protection and IT resilience, Recovery Point Systems offers a range of services including managed hosting, cloud-based disaster recovery, and cybersecurity solutions. Recognized as an industry leader by Gartner®, Forrester® and other leading industry analysts, we seek talented, dynamic individuals to join our team.

### **Job Description**

The Director of Mainframe Services is responsible for leading all aspects of operations of the mainframe infrastructure and technical team which support our client's Mainframe DR environments. You possess a keen risk-oriented approach with a focus on resiliency and incident prevention. You also have a detailed understanding of mainframe technology along with related platform management experience such as hardware and software contracts, budgeting, and financial foresight.

#### **Job Responsibilities:**

- Provide leadership, mentorship, and oversight to a mainframe technical team.
- Able to support multiple priorities and goals in a fast-paced work environment.
- Adapt quickly to changing priorities and targets.
- Exercise creativity to overcome roadblocks and challenges.
- Engage in budget activities along with contract governance for mainframe hardware, software, and statements of work.
- Contribute to the short- and long-term strategic roadmaps for the mainframe platform.
- Incident management leadership and presentation of root cause analysis.
- Develop, improve, and present operational metrics and documentation.
- Provide input and follow-through for continuous improvement to Mainframe processes and procedures via RACIs.
- Present to senior leadership on mainframe programs.
- Provide mentorship to operations team to improve service availability, scalability, security, and Performance.
- Evaluate, coordinate, and approve changes to the environment, with a focus on quality.

## Required Skills

- Analytical, strategic, and problem-solving abilities.
- Able to connect with senior leadership and business partners optimally.
- Excellent organizational, communication, and leadership skills.

## Education/Experience

- BA or BS or equivalent experience.
- Minimum of 8-10 years in Management / Leadership role in an IBM z/OS and z/VM environments.
- Knowledge of Mainframe licensing, hardware and software contracts, consumption models, IBM billing, etc.
- Possess a keen risk-oriented approach with a focus on resiliency and incident prevention.
- Detailed understanding of mainframe technology along with related platform management experience such as hardware and software contracts, budgeting, and financial foresight.
- Strong background in mainframe systems planning, design, and implementation.
- Eligible to obtain and maintain a DoD security clearance.
- Ability to satisfy a background check.

## Compensation/Benefits

- Health insurance package (medical/dental/vision/disability/life)
- Competitive salary
- 401(K) plans
- Paid holidays
- Paid time off
- Parental leave
- Flexible hours
- Pregnancy leave

**Job type:** Full-time
